| | | SEIT1001<br>[…] | _Corpus_SensEx > it > 1.0_New-data (24 samples) > the first sample (01) |
| 2 | IDENTIFIANT (interne) | Long unique identifier (internal) | |
| 3 | source_url | URL of the source content | |
| 4 | origin_platform | Platform on which the content originally appeared: YT<br>TK<br>TWC<br>TWX<br>(Note: the original platform is not always straightforward to identify though.) | |
| 5 | diffusion_platform | | |
| 6 | prejudgement | Preliminary assessment of excessiveness (exc = excessive ; nexc = non-excessive) | |
| 7 | segment_start | HH:MM:SS<br>Start time of the sample | |
| 8 | segment_end | HH:MM:SS<br>End time of the sample | |
| 9 | segment_duration | HH:MM:SS<br>Duration of the sample | |
| 10 | primary_language | Main language of the sample (fr, it) | |
| 11 | code_switching_presence | Default: na (non applicable)<br>If code-switching occurs: y (yes) | |
| 12 | code_switching_1 | Language/variety involved in code-switching, e.g. en (=English), it_dialect (= Italian dialect), ar (=Arabic). If several languages/varieties are involved, additional columns should be added: code_switching_2, code_switching_3, etc. | |

| | | |
|---|---|---|
| 13 | publication_date | YYYY-MM-DD<br>Date on which the content was published/uploaded on the platform |
| 14 | creator_account_name | Creator's account name / username |
| 15 | creator_type | Type of content creator/account.<br>Possible values: influencer_creator, political_actor, collective_channel.<br>Note: Tagset to be further discussed/refined. |
| 16 | source_title | Title of the video/content as provided by the content creator (displayed under the URL).<br>Note: To be adapted/clarified for TikTok and other platforms where conventional titles may be absent. |
| 17 | collection_date | Date on which the sample was collected |
| 18 | metrics_observed_at | Date/time at which platform metrics were observed, when shares, likes, views, follower counts, etc. were not collected at the same time as the sample itself. |
| 19 | creator_follower_count | Creator's number of followers.<br>Numeric value only. If the data cannot be accessed: na. |
| 20 | view_count | Number of views.<br>Numeric value only. If the data cannot be accessed: na |
| 21 | like_count | Number of likes, by default at the time of collection.<br>Numeric value only. If the data cannot be accessed: na |
| 22 | share_count | Number of shares.<br>Numeric value only. If the data cannot be accessed: na |
| 23 | gesture_presence | Presence of visible gestures/gestural activity in the video: Y = yes; N = no. |
| 24 | activity_type | Type of communicative/activity setting, e.g. product testing, commenting on comments, video-game commentary, unboxing, etc.<br>Note: Tagset to be established. |
| 25 | speaker_singing_presence | Presence of singing or melodic vocal/audio signals produced by the speaker(s): Y = yes; N = no |
| 26 | background_music_presence | Presence of background music: Y = yes; N = no |
| 27 | salient_object_presence | Presence of one or more salient objects: Y = yes; N = no |
| 28 | multi_screen_presence | Presence of multiple simultaneously displayed screens/windows (multi-screen configuration): Y = yes; N = no |
| 29 | speaker_count | Number of people who speak/appear in the sample |
| 30 | content_origin | Origin/production source of the content:<br>human = human-produced;<br>ai_generated_video;<br>hybrid;<br>bot_automated |
| 31 | oral | Presence of spoken stimuli: Y = yes; N = no |
| 32 | text_on_screen_presence | Presence of text displayed on screen, including internal/external captions or didascalia, subtitles, chat overlays, etc. Possible distinctions include text_on_screen_presence, subtitles_presence, and chat_overlay_presence. For the time being: Y = yes; N = no |
| 33 | production_mode | Degree/type of planning involved in content production: spontaneous, semi_planned, scripted, unknown |
| 34 | editing_presence | Whether the video has undergone editing/psot-production: Y = yes; N = no |
